

Booster®

A patented, highly purified monoglyceride suspended in certified organic red palm fruit oil

PRODUCT DESCRIPTION

The oil in this product is extracted from the pulp of the fruit of the palm tree *Elaeis guineensis*. The palm trees are organically cultivated on long-established, sustainable agricultural farms in Brazil (in accordance with USDA Certified Organic Standards). Sunshine Factor® is pressed from the palm fruit clusters and processed using only steam and pressure; no chemical solvents are used in any stage of production. Sunshine Factor® is then blended with Booster® Concentrate to form Booster®.

COLOR AND SOLIDITY VARIATION

Because Sunshine Factor® and Booster® are natural products, color and solidity may vary from batch to batch. The consistency of Sunshine Factor® and Booster® are also temperature-dependent. Scientific analysis is conducted on each batch to ensure consistency of composition. Phase separation is a natural property of Sunshine Factor® due to its typical composition, with approximately 50% saturated fatty acids, 40% monounsaturated fatty acids and 10% polyunsaturated fatty acids. Booster® Concentrate may harden within the product, creating “streaks” at room temperature. This is normal.
